

LOOKING, SEEING and PERCEIVING - Critical Skills for Pilots

There's a world of difference between passive looking and actually being able to see and make sense of what we are looking at. Dr. Kerber will guide you to explore the passage of a single light photon as it comes into the eye, then travels to the association areas of the brain, and so learn to develop a more precise interpretation of our visual world.

Directions: Exit I-15 or SR-163 at Balboa Ave; go west from I-15, east from SR-163 to Ruffin Road, south on Ruffin Road to the first traffic light at Ridgehaven, turn west into the Solar Turbines parking lot.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASteam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
